Pack size	1 unit
Drying time	Less than 5 minutes
Storage time	No expiration date
Fire hazard	Not flammable

The fast, easy to work with and economic method to repair damages in laminate, wood, parquet, cork, linoleum, plastic etc. Can be used on flooring, furniture and other interior decoration. Tarkett Repair Box includes 20 nuances of hard wax repair bars à 15 gram, melting device, a plastic spatula and hand pad.

Instructions

Test on a non visible surface before repairing.

1. Prepare the damage by cutting off / rounding uneven edges.
2. Slide the end cover of the melting device and insert two AA batteries as per the diagram on the device.
3. Move the switch to "ON". Press the button on the switch when melting effect is wanted.
4. Melt the hard wax by holding it to the tip so that it melts into the damage. Several nuances can be mixed to achieve the best result. When repairing lacquered wood, transparent hard wax can be mixed in to obtain a certain "depth" to the reparation.
5. Turn the melting device off by moving the switch to "OFF".
6. Let the hard wax harden for a couple of seconds, but do not wait too long.
7. Carefully cut off excess wax with the spatula.
8. The gloss of the reparation can be altered by carefully rubbing it with a hand pad or steel wool. It can also be varnished with lacquer of the desired gloss.

Refill

The wax bars can be ordered as a refill with itemcode 8793129.

The order must be of 10 pcs as a minimum and 2 pcs / colour. Use the overview of the different colours, Product Information for Repair Box - Refill, and specify the number when the order is placed.
